STATINTL

STATINTL

[Redacted]
Chairman, DCI Security Survey
Central Intelligence Agency
Washington, D.C. 20505

[Redacted]
Reference is made to your memorandum to Members, DCI Security Committee, dated June 5, 1980, wherein you requested concurrence and comments on the recommendations resulting from the Personnel Security Survey.

I generally concur in the conclusions and recommendations, including the Working Group recommendations. I feel strongly that the personal interview with the subject should be conducted prior to initiation of the full-field investigation to verify the answers to questions on the subject's security questionnaire. I also believe that the security questionnaire used by many agencies (SF-86) should be reworked to include, for example, questions concerning drug use.

Also, I believe that the use of the polygraph for access to SCI will be very difficult to implement outside of agencies like CIA and NSA. First of all it will be expensive and second, it will encounter much resistance from potential subjects such as, for example, lawyers who are assigned to work on litigation requiring SCI access. For these reasons, this recommendation, if adopted, should get the highest level of approval possible.

If I can be of further assistance in this matter, please call me on 633-2094.

Sincerely,

D. Jerry Rubino
D. Jerry Rubino, Director
Security Programs Staff
Justice Management Division
